DETAILED ACTION

Allowable Subject Matter

1. Claim 1 is allowed.
2. The following is an examiner's statement of reasons for allowance: None of the prior art teaches a method for detecting the presence of humans or animals in a vehicle that includes acquiring a digital channel signal of the motion of the vehicle, computing the continuous wavelet transform of the signal, computing an energy image for each wavelet-space representation, computing the total energy using the energy image, comparing the total energy to a preset maximum, comparing the total energy to a preset minimum, dividing the energy image into equal-length overlapping segments in time, computing the ratio of the resonant frequency energy to the total energy for each segment, retaining the minimum ratio value as the result of the test when all segments have been processed and comparing the result to a preset threshold, as shown in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dress et al. ("Enclosed Space Detection System") teach using wavelet transform of motion signals to detect a person hidden in a vehicle.

Kercel et al. ("Application of the Smart Portal in Transportation") teach using wavelet transform of motion signals to detect a person hidden in a vehicle.

Ito et al. (US Patent No. 5,814,897) teach using processing a signal from an acceleration sensor in a vehicle using a wavelet transform.
